THEORETICAL AND MATHEMATICAL PHYSICS

Volumes 54–57, 1983

(A translation of Teoreticheskaya i Matematicheskaya Fizika)

Volume 54, Number 1 January, 1983

	Engl.	Russ.
A Statistical Physics Model – V. S. Vladimirov and I. V. Volovich	1	8
Application of Inverse Scattering Method to Singular Solutions of Nonlinear Equations. II – V. A. Arkad'ev, A. K. Pogrebkov, and M. K. Polivanov	12	23
A Method of Approximate Calculation of Feynman Diagrams. I – O. I. Zav'yalov	23	38
Infrared Singularities of the Gluon Propagator and Quark Confinement in the Limit of an Infinite Number of Colors – A. A. Slavnov	31	52
On Field Algebras in Quantum Theory with Indefinite Metric – K. Yu. Dadashyan and S. S. Khoruzhii	35	57
On Random Fields Corresponding to the BBGKY, Vlasov, and Boltzmann Hierarchies – V. P. Maslov and A. M. Chebotarev	48	78
On Super-Self-Duality Equations – I. V. Volovich	55	89
Complex Geometry and Integral Representations in the Future Tube in C^3 – A. G. Sergeev	62	99
Use of the Distribution Function Method in Field Theory – V. F. Tokarev	70	111
Calculation of Many-Loop Diagrams of Perturbation Theory – N. I. Usyukina	78	124
Use of the Method of Ordered Operators in the Theory of Laser Systems. Derivation of Asymptotically Exact Equations for Radiation. I – G. O. Balabanyan	82	130
Green's Functions in the Dicke Model. I. Evolution Equation – N. N. Bogolyubov (Jr), A. R. Kazaryan, A. M. Kurbatov, and V. N. Neskoromnyi	93	147
Quantum Field Theory Models with a Large Number of Colors and the Statistical Physics of Disordered Systems – I. Ya. Aref'eva	97	154

Volume 54, Number 2 February, 1983

	Engl.	Russ.
Quark Counting of Anomalous Dimensions for Singlet Distributions – I. S. Avaliani, V. A. Matveev, and L. A. Slepchenko	103	163
Covariant Three-Dimensional Equation for the Wave Function of the π Meson in the Composite Model of Spinor Quarks – V. I. Savrin, N. B. Skachkov, and G. Yu. Tyumenkov	110	173
Relativistic Wave Functions for a System of Two Spin $\frac{1}{2}$ Quarks in a Model with Chromodynamic Interaction – N. B. Skachkov and I. L. Solovtsov	116	183
Path Integral Over a c-Number Measure for Interacting Bosons and Fermions – L. F. Novikov	123	193
Integrals of the Motion of a Closed Relativistic String – A. P. Isaev	134	209
Canonical Quantization on the Light Cone – F. A. Lunev	141	219
On Quantum and Thermodynamic Fluctuations of Fermion Fields in a Finite Volume – I. V. Krive	149	230
Structure of Axisymmetric Soliton Solutions of Einstein's Equations – A. P. Veselov	155	239
Many-Soliton Solutions of Asymmetric Chiral SU(2) and SL(2, R) Theories ($d = 1$) – A. B. Borisov and V. V. Kiselev	160	246
Investigation of Baryon-Like Bound States of Nonrelativistic Quarks in the Self-Consistent Field Approximation – A. A. Bogolyubskaya and I. L. Bogolyubskii	168	258
Recursive Models in Percolation Theory – V. P. Bovin, V. V. Vas'kin, and I. Ya. Shneiberg	175	268
Use of the Method of Ordered Operators in the Theory of Laser Systems. II. Construction of a Theory of Laser Radiation for Dicke Models – G. O. Balabanyan	181	277
Spectrum of Elementary Excitations in Compounds Formed by a Rare-Earth Metal and a Transition Metal – Ya. M. Neimatov	189	289
Single-Particle Green's Function of a Ferromagnet with Single-Ion Anisotropy in the Presence of a Magnetic Field of Arbitrary Direction – F. P. Onufrieva	196	299
Bosonization of Fermions in Two-Dimensional Models – A. V. Kulikov	205	314

Volume 54, Number 3 March, 1983

Two-Dimensional Nonlinear Equations of String Type and their Complete Integration – A. N. Leznov and M. V. Savel'ev 209 323
Spin Dynamics in Quantum Theory with Definite Parity of Operators – V. A. Bordovitsyn and I. M. Ternov 218 338
Modifications of Forms of Relativistic Dynamics Associated with Poincaré Transformations – S. N. Sokolov 224 346
Parastatistics and Parafields – A. B. Govorkov 234 361
Meson Annihilation Form Factor and Relativistic Wave Function for Bound States – V. I. Savrin and N. B. Skachkov 242 372
Gauge Theory for the Poincaré Group – M. O. Katanaev 248 381
On an Approximation in Quantum Chromodynamics – A. I. Alekseev, V. A. Baikov, and É. É. Boos 253 388
Vacuum Polarization of a Massless Field and Conformal Transformations – A. A. Grib and N. Sh. Urusova 260 398
Covariant Two-Particle Wave Functions for Model Quasipotentials that Admit Exact Solutions. I. Solutions in Momentum Space – V. N. Kapshai and N. B. Skachkov .. 265 406
Quasipotential Coulomb Scattering of Scalar Particles – V. Sh. Gogokhiya 272 416
Quasiclassical Integral Representations of the Scattering Amplitude for Rearrangement Processes – A. V. Bogdanov and G. V. Dubrovskii 278 426
Thermodynamic Properties of a One-Dimensional Heisenberg System with Long-Range Interaction – R. S. Gekht 283 434
P-Polarized Nonlinear Surface and Bounded (Guided) Waves in Layered Structures – D. Mikhalake and V. K. Fedyanin 289 443
Transport Coefficients in the Theory of Channeling in a Wide Range of Transverse Energies – Yu. A. Kashlev and N. M. Sadykov 298 456
Bogolyubov Transformation in Terms of Creation and Annihilation Operators – O. D. Timofeevskaya 303 464
Conoidal Waves in the φ^4 Model with Self-Interacting Currents – V. E. Grishin and V. K. Fedyanin 307 469
Quasiclassical Quantization of the Periodic Toda Chain from the Point of View of Lie Algebras – Yu. M. Vorob'ev and S. Yu. Dobrokhotov 312 477

Volume 55, Number 1 April, 1983

Gauge Principle for Hyper(para)fields – A. B. Govorkov 315 3
σ-Model Representation of Supersymmetric Gauge Theory – V. P. Akulov and V. G. Zima 322 14
Covariant Two-Particle Wave Functions for Model Quasipotentials that Admit Exact Solutions. II. Solutions in the Relativistic Configuration Representation – V. N. Kapshai and N. B. Skachkov 330 26
Supersymmetric Yang–Mills Theory as a Holomorphic Vector Bundle over Twistors and Super-Self-Duality – I. V. Volovich 338 39
Spontaneous Symmetry Breaking in Some Higgs Potentials – K. G. Klimenko 342 44
Supersymmetric Quasipotential Equations – R. P. Zaikov 350 55
On Finiteness of the Discrete Spectrum of the Energy Operators of Multiatomic Molecules – S. A. Vugal'ter and G. M. Zhislin 357 66
Steady Solutions of the BBGKY Hierarchy and First Integrals of the Motion of a System of Classical Particles. One-Dimensional Case – Yu. M. Sukhov 365 78
Forms of Relativistic Dynamics in a Classical Lagrangian Description of a System of Particles – R. P. Gaida, Yu. B. Klyuchkovskii, and V. I. Tretyak 372 88
Dynamic Properties of Ferromagnets with Single-Ion Anisotropy of Easy-Axis Type – D. A. Garanin and V. S. Lutovinov 385 106
Statistical Mechanics of an Elastic Ising Chain with Exchange Striction – A. F. Sadreev 393 118
Statistical Theory of Crystallization in Classical Systems – V. N. Ryzhov 399 128
Generalized Diagram Technique of Nonequilibrium Processes – S. S. Fanchenko 406 137
Statistics of an Ensemble of Nonlinear Classical Oscillators in the Field of an External Harmonic Force when the Oscillators Have Two Stable States – S. V. Zatsepin 410 143
Interaction of Self-Consistent Phonons and Librons in a Microscopic Theory of Mesogenous Molecular Crystals – V. S. Zhukov 416 152
Estimate of the Critical Density of Bose–Einstein Condensation in a Periodic Potential – A. A. Arsen'ev 419 156

Volume 55, Number 2 May, 1983

Analog of Dimensional Regularization for Calculation of the Renormalization-Group Functions in the 1/n Expansion for Arbitrary Dimension of Space – A. N. Vasil'ev and M. Yu. Nalimov	423	163
Dimensional Regularization of Chiral Superfields – A. Yu. Kamenshchik	431	176
Nonlinear Two-Dimensional Field Theory Models and Painlevé Equations – V. I. Gromak and V. V. Tsegel'nik	440	189
Symmetries of Scalar Fields. I – A. G. Meshkov	445	197
Bogolyubov Transformation in the Lee Model – V. G. Bornyakov and O. D. Timofeevskaya	451	205
Quantum Particle Production in a Homogeneous Isotropic Universe from States Described by a Density Matrix – A. I. Zhuk and V. P. Frolov	458	216
Kinetics of Small Perturbations in Closed and Open Friedmann Cosmologies – A. V. Zakharov	463	224
Exact Solutions of Quasipotential Equations for the Coulomb Potential and a Linear Confining Potential – V. N. Kapshai and N. B. Skachkov	471	236
Percolation in Random Fields. I – S. A. Molchanov and A. K. Stepanov	478	246
Model of Free Electrons and the Scattering Problem – B. S. Pavlov and M. D. Faddeev	485	257
On the Discrete Spectrum of the Energy Operator of One- and Two-Dimensional Quantum Three-Particle Systems – S. A. Vugal'ter and G. M. Zhislin	493	269
Convergence to Equilibrium for a Free Fermi Gas – Yu. M. Sukhov	503	282
Calculation of the Free Energy of a System of Two-Particle Clusters – N. A. Korinevskii	509	291
Perturbation Theory and Equation of State for Dense and Condensed Media – V. M. Sysoev	518	305
Closed Kinetic Equation for the Density Matrix of a Subsystem Interacting with Phonons – V. F. Los' and A. G. Martynenko	523	313

Volume 55, Number 3 June, 1983

On the Possibility of Conformal Infrared Asymptotic Behavior in Non-Abelian Yang–Mills Theory – A. N. Vasil'ev, M. M. Perekalin, and Yu. M. Pis'mak	529	323
Charged Vector Particles in a Magnetic Field – I. A. Obukhov, V. K. Peres-Fernandes, I. M. Ternov, and V. R. Khalilov	536	335
On a Class of Exact Solutions of Quasipotential Equations – V. N. Kapshai, S. P. Kuleshov, and N. B. Skachkov	545	349
Covariant Perturbation Theory in the Neighborhood of a Classical Solution – K. A. Sveshnikov	553	361
Invariant Current Algebra on the Light Cone and Deep Inelastic Lepton–Hadron Scattering. II – F. A. Lunev	569	385
Anomalies in the Two-Dimensional σ Model with Fermions – R. G. Ismagilov and V. A. Franke	580	401
Local Scale Transformation Method for the Ground State of Many-Particle Systems – I. Zh. Petkov and M. V. Stoitsov	584	407
Percolation in Random Fields. II – S. A. Molchanov and A. K. Stepanov	592	419
Superconductivity in Spin Glass – O. P. Bezzub, V. A. Moskalenko, and M. E. Palistrant	600	431
Theory of Bound States of Fermions in Many-Body Systems – K. Kilimann, D. Kremp, and G. Röpke	611	448
Sturm Representation of the Green's Function of an Arbitrary Number of Particles Interacting by the Oscillator Law – A. A. Sadovoi	620	461
Cubic Approximation and Local Restrictions on the Functional Arbitrariness in the General Solution of the Chew–Low Equations – V. P. Gerdt and A. Yu. Zharkov	626	469
Two Definitions of a Determinant and Proof of the Szegö–Kac Theorem – B. N. Valuev	630	475

Volume 56, Number 1 July, 1983

Nonlinear Realization of Extended Superconformal Symmetry – V. P. Akulov, I. A. Bandos, and V. G. Zima	635	3
The CP^{N-1} Model: Calculation of Anomalous Dimensions and the Mixing Matrices in the Order 1/N – A. N. Vasil'ev and M. Yu. Nalimov	643	15
Invariant Current Algebra on the Light Cone and Deep Inelastic Lepton–Hadron Scattering. III. Neutrino Reactions – F. A. Lunev	654	31
Asymptotic Soliton-Like Solutions of the Nonlinear Schrödinger Equation with Variable Coefficients – V. Yu. Subochev and V. A. Tsupin	661	42

Motion of an Electron in a One-Dimensional System with Displacement Phase Transition – F. Kh. Abdullaev 669 54
Quantum N-Body Scattering Theory in Configuration Space – S. P. Merkur'ev and S. L. Yakovlev 673 60
The Inverse Problem of Quantum Mechanics for a Linear Potential – V. B. Gostev, V. S. Mineev, and A. R. Frenkin 682 74
Markovian KMS States – V. Ya. Golodets and G. N. Zholtkevich 686 80
Statistical Theory of the Hydrodynamic and Relaxation Processes in Smectic Liquid Crystals – V. B. Nemtsov 691 87
Quasiclassical Green's Functions – V. L. Bakhrakh, S. I. Vetchinkin, and I. M. Umanskii 701 103
Nonequilibrium Statistical Thermodynamics and Rheology of Non-Newtonian Fluids. I. Description of Nonlinear Transport Processes in Continuous Media Using the Nonequilibrium Distribution Function Method – S. V. Tishchenko 709 114
Quantum Scattering By a Brownian Particle With Complex Potential – S. E. Cheremshantsev .. 716 125
On the Integrability of Equations of Davey–Stewartson Type – E. I. Shul'man 720 131
Thermal Conductivity of Superconducting Alloys with Paramagnetic Admixture at an Electronic Topological Transition – O. P. Bezzub, V. A. Moskalenko, and M. E. Palistrant 724 137
Dyson Equation for Spin Green's Functions – V. G. Bar'yakhtar, V. N. Krivoruchko, and D. A. Yablonskii 731 149
Construction of Dynamical Symmetry Group of the Relativistic Harmonic Oscillator By the Infeld–Hull Factorization Method – N. M. Atakishiev 735 154

Volume 56, Number 2 August, 1983

Infrared Divergences of Green's Functions and Renormalization in Massless Theories. III – S. A. Anikin, M. Bordag, and O. I. Zav'yalov 741 163
Gauge Fields in Mechanisms of Spontaneous Compactification of Subspaces – D. V. Volkov, D. P. Sorokin, and V. I. Tkach 746 171
Bäcklund Transformation for the Liouville Equation and Gauge Conditions in the Theory of a Relativistic String – B. M. Barbashov and V. V. Nesterenko 752 180
Quantum Theory of a Restricted Class of Motions of a Relativistic String – G. P. Pron'ko and A. V. Razumov 760 192
Dimensional Regularization and Infrared Divergences – V. A. Smirnov and K. G. Chetyrkin 770 206
Infrared Divergences in a Model Related to the Heisenberg Algebra – I. V. Krivchenkov and N. A. Sveshnikov 777 216
Gauge Description and Nonlinear String Equations in d-Dimensional Space–Time – A. A. Zheltukhin 785 230
Linear Connection in Theories of Kaluza–Klein Type – M. O. Katanaev 795 246
Calculation of Spontaneous Magnetization of the Two-Dimensional Ising Lattice in Yang's Approach – B. N. Valuev 799 251
Excitation Spectrum of the Anisotropic Generalization of an SU_3 Magnet – V. I. Vichirko and N. Yu. Reshetikhin 805 260
Sturm Expansions in Many-Fermion Problems – A. I. Sherstyuk 813 272
Theory of SNS Sandwiches with Nonmagnetic Impurities of Arbitrary Concentration for Near-Critical Temperatures – S. M. Savchenko and A. V. Svidzinskii 823 288
The Energy Determined in General Relativity on the Basis of the Traditional Hamiltonian Approach Does Not Have Physical Meaning – V. I. Denisov and V. O. Solov'ev 832 301
Note on the Paper by V. I. Denisov and V. O. Solov'ev – L. D. Faddeev 842 315
On Faddeev's Note – V. I. Denisov and V. O. Solov'ev 843 316

Volume 56, Number 3 September, 1983

Hamiltonian Structures for Integrable Models of Field Theory – N. Yu. Reshetikhin and L. D. Faddeev 847 323
Quantum Superconformal Model in (1, 2) Space – V. P. Akulov and A. I. Pashnev 862 344
An Algorithm for Calculating Multiloop Integrals – F. V. Tkachev 866 350
Quantum-Mechanical Oscillator with Arbitrary Anharmonicity: 1/N Expansion and Perturbation Theory – A. V. Kudinov and M. A. Smondyrev 871 357

On the Infinite-Dimensional Noncommutative Lie–Bäcklund Algebra Associated with the Equations of One-Dimensional Gas Dynamics – M. B. Sheftel' 878 368
Linear and Nonlinear Systems of Differential Equations Invariant with Respect to the Schrödinger Group – V. I. Fushchich and V. M. Shtelen' 891 387
Estimate of the Conversion Time in Macroscopic Two-Level Systems – E. K. Bashkirov, N. N. Bogolyubov (Jr), and A. S. Shumovskii 897 395
Multiphase Behavior of Large Interacting Molecules on a Flat Square Lattice in the Percus–Yevick Approximation – Yu. V. Shulepov 903 405
Derivation of Asymptotically Exact Equations for the Radiation in Model Systems of Dicke Type – G. O. Balabanyan 912 418
Generalized Convexity Property for the Energy of a Quantum-Mechanical System – T. K. Rebane 922 432
Trace Formulas for Resonances – A. V. Rybkin 927 439
Classical Inversion Algorithms for Spherically Symmetric Gravitational Fields – I. V. Bogdanov 933 448
Cluster Propagator in Quantum Field Theory – O. A. Mogilevskii 942 460
Calculation of Polaron Conductivity by Functional Integration – S. N. Gorshkov, C. Rodriguez, and V. K. Fedyanin 946 467
Upper Bound on Diffraction Peak Width – Yu. S. Vernov and Yu. D. Chernichenko 952 476
Corrigenda to "Casimir operators of the groups of motion of spaces of constant curvature" (N.A. Gromov, Teor. Mat. Fiz., 49, 210 (1981)) 954 480

Volume 57, Number 1 October, 1983

Approximate Solution of Matrix N × N Models at Large N – A. A. Slavnov 955 4
Continued Unitarity and High-Energy Hadron Scattering – N. I. Glushko, N. A. Kobylinskii, and V. P. Shelest 960 12
Meson Lagrangians of the Group U(3) in a Model With Four-Quark Interactions – M. K. Volkov and D. V. Kreopalov 966 21
Role of Spin Effects in the Growth of the Total Cross Sections of Nucleon–Nucleon Scattering at Superhigh Energies – S. V. Goloskokov, S. P. Kuleshov, and V. G. Teplyakov 975 35
Finite-Energy and QCD Sum Rules – L. L. Enkovskii and B. V. Struminskii 979 41
Symmetries, Conservation Laws, and Exact Solutions in Nonlinear Sigma Models – G. G. Ivanov 981 45
Coherent States for Sp(2, 2) and Geometrized Decay Model for an Unstable System – I. A. Filanovskii 988 55
Quasiclassical Asymptotic Behaviors for Discrete Models of Electron–Phonon Interaction: Maslov's Method and the Adiabatic Approximation – Yu. M. Vorob'ev and S. Yu. Dobrokhotov 993 63
Basic Equations of the Quasiparticle–Phonon Model of the Nucleus – V. V. Voronov and V. G. Solov'ev 1001 75
Equations for Bogolyubov's Reduced Distribution Functions and Their Solution for Arbitrary Values of the Particle Density – N. S. Gonchar 1007 85
Ground States of Antiferromagnetic Hierarchical Dyson Models – Ya. G. Sinai 1014 97
Percolation Through a Finite Layer – I. P. Tsaregradskii 1020 105
Coherent Dynamics of Three Coupled Oscillators – V. N. Popov and V. S. Yarunin 1027 115
Influence of Relaxation on Self-Induced Transparency of the Extraordinary Wave – G. T. Adamashvili 1031 121
On Ulam's Problem – L. D. Pustyl'nikov 1035 128
Nonequilibrium Statistical Thermodynamics and Rheology of Non-Newtonian Fluids. II. Rheological Models – S. V. Tishchenko 1039 133
Generating Functional of the Classical Scattering Problem in a System with Nontrivial Dynamics – V. G. Bakurov 1045 143
Wave Functions of Quantum Integrable Systems – M. A. Ol'shanetskii 1048 148
Influence of Phonon Interaction on the Ground State of Even–Even Spherical Nuclei – Nguyen Din Dang and V. Yu. Ponomarev 1053 154

Volume 57, Number 2 November, 1983

Local Hamiltonians for Integrable Quantum Models on a Lattice – V. O. Tarasov, L. A. Takhtadzhyan, and L. D. Faddeev 1059 163

Relativistic Partition Function and Polarization Properties of a Fermi Gas – G. M. Zinov'ev, Yu. M. Sinyukov, and V. P. Shelest 1073 182
Theory of Representations of the Superalgebra of Extended Supersymmetry – Nguyen Van Hieu 1080 193
The Inverse Scattering Method for a Relativistic String – G. P. Pron'ko 1086 203
Group-Theoretical Derivation of Path Integrals – M. B. Menskii 1095 217
Qunatization of Systems with Constraints of the First Class – A. V. Razumov and A. Yu. Taranov 1106 232
Explicit Solutions of O(3) and O(2, 1) Chiral Models and the Associated Equations of the Two-Dimensional Toda Chain and the Ernst Equation when the Solutions Are Parametrized by Arbitrary Functions – M. G. Tseitlin 1110 238
Collective Excitations in the Superfluid A and B Phases of He^3 in an Electric Field – P. N. Brusov and V. P. Popov 1118 249
Relativistic Particle of Arbitrary Spin in a Coulomb Field and the Field of a Plane Electromagnetic Wave – A. G. Nikitin 1123 257
Solution of the Cauchy Problem and the Commutator Function for a Tensor Wave Equation – A. A. Leonovich 1129 265
Renormalization-Group Approach in the Theory of Turbulence: The Dimensions of Composite Operators – L. D. Adzhemyan, A. N. Vasil'ev, and Yu. M. Pis'mak 1131 268
Two-Soliton Excitation in an Infinite Molecular Chain – A. D. Suprun 1141 282
Time Asymptotics of the Velocity Autocorrelation Function in the Lorentz Model. I – V. D. Ozrin 1146 290
Spectrum and Eigenfunctions of Schrödinger Operator with Zero-Range Potential of Homogeneous Lattice Type in Three-Dimensional Space – Yu. E. Karpeshina 1156 304
Hierarchical Model of Spin Glass – A. Naimzhanov 1163 314

Volume 57, Number 3 December, 1983

Quantum Theory of a Fermion String with a Finite Number of Degrees of Freedom – M. S. Plyushchai, G. P. Pron'ko, and A. V. Razumov 1167 323
Gas of "Connected Configurations" and Allowance for the "Hard-Core" Potential of Contours in the Mayer Expansion of a Gas of Lattice-Model Contours – A. G. Basuev 1178 338
Normal Gauge in Supergravity – O. M. Khudaverdyan and A. S. Shvarts 1189 354
Corrections to the Asymptotic Expressions for the Higher Orders of Perturbation Theory – Yu. A. Kubyshin 1196 363
Upper Bound for the Partition Function of $P(\varphi)_2$ Euclidean Field Theory with Dirichlet Boundary Conditions – V. V. Borzov 1203 373
Symmetries of Scalar Fields. II – A. G. Meshkov 1209 382
The Method of Collective Variables in Relativistic Theory – A. V. Shurgaya 1216 392
Spectrum of Renormalization Group Differential – M. D. Missarov 1225 406
Spectrum and Eigenfunctions of the Schrödinger Operator in Three-Dimensional Space with Point Potential of the Type of a Homogeneous Two-Dimensional Lattice – Yu. E. Karpeshina 1231 414
On Measurements of the Parameters of a Quantum Random Process – A. S. Kholevo 1238 424
Inclusion of Neutron–Proton Phonons in the Quasiparticle–Phonon Nuclear Model – V. G. Solov'ev 1248 438
Spectral Representations for the Time Correlation Functions of Noninvariant Systems in the Theory of Nonadiabatic Transitions – A. I. Ivanov, G. S. Lomakin, and O. A. Ponomarev 1255 448
On the Phase Diagram in the Frenkel'–Kontorova Model – A. Ya. Zaslavskii 1262 459
A Theorem about States on Quantum Logics. States on Jordan Algebras – M. S. Matveichuk .. 1266 465
Supersymmetric Yang–Mills Theory and the Inverse Scattering Method – I. V. Volovich 1269 469
